

Payments Specialist

As the leader of our Payments team, you will be dedicated to partnering with our portfolio companies to design & deliver strategic solutions that seize revenue growth, mitigate risk & achieve compliance. As a member of our Payments Team you will be dedicated to driving transformation & modernization across products, processes & systems related to lending, mobile banking, credit transactions, ATM & savings.

What You'll Do:

- » Lead and develop the Payments and Emerging Technology practice for Cerberus Technology Solutions (CTS)
- » Build strong relationships with stakeholders across the payments value chain – payment networks, processors, technology partners, etc.
- » Demonstrate a strong understanding of consumer/industry trends and emerging technologies impacting the digital payments space
- » Recommend opportunities to streamline payment processes that drives cost reduction and operational efficiencies for portfolio companies and clients.
- » Architect digital solutions that leverages modernized payments technology (i.e. mobile wallets, tokenization, remote payments, etc.)
- » Assess architecture governance processes and ensure compliance with all relevant regulations
- » Identify opportunities to adopt and integrate emerging technology (blockchain, IOT, robotics, natural language processing) across CTS engagements
- » Ability to train and share knowledge with others (Portfolio Companies' management and Cerberus resources)

Who You Are:

- » An analytical thinker with deep commercial orientation and proven ability using data-driven approaches to drive high-impact results
- » Driver of enterprise technology, preferable payments
- » Entrepreneurial, creative self-starter; able to work independently with limited direction
- » Strong interpersonal and communication skills
- » 7+ years of related work experience in financial services and/or information technology

Other Requirements:

U.S. work authorization – We are unable to provide sponsorship
